

RAPID Response

Ceiling Mounted Header Box Fan

What does it do?

The Rapid Response Range exhausts steam, odours & fumes from bathroom & laundry spaces with a built-in backdraft damper (see “accessories”).

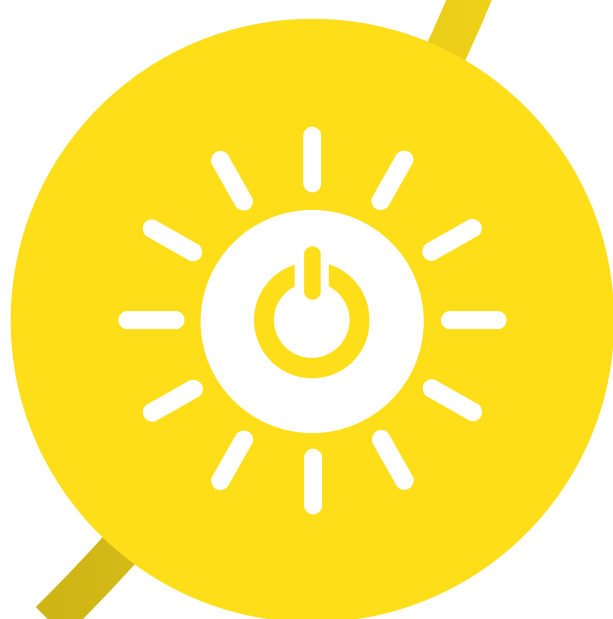

Why is it important?

Exhaust of damp air filled with warmth & moisture from a bathroom or laundry space, mitigates the growth of mould and or introduction of damp odours to the rest of a home.

How does it work?

The Rapid Response Range are ceiling mounted exhaust fans which are ducted through a direct line to atmosphere. This is achieved via a External Wall Mounted Grille or EziFit Thru Roof Relief Vent (see “accessories”). Can be used in conjunction with an electrical Run-On-Timer (see “accessories”).

Power Usage

The Rapid Response Range uses extremely little energy and is required ONLY as the space is used.

Average Energy Consumption: <50kW/ year
Average Energy Cost: <\$15/ year
