

HCM Series

Thru Glass/Wall Mounted Fan

What does it do?

The HCM Series are an External Wall or Window Mounted unit which exhaust steam, odours & fumes from bathroom & laundry spaces.

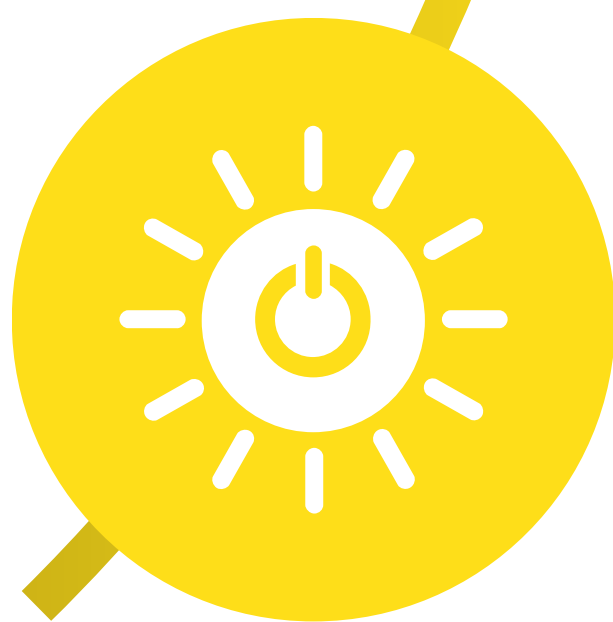

Why is it important?

Exhaust of damp air filled with warmth & moisture from a bathroom or laundry space, mitigates the growth of mould and or introduction of damp odours to the rest of a home.

How does it work?

The HCM Series is a set-and-forget style fan which can be programmed to your light switch and used in conjunction with an electrical Run-On-Timer (see "accessories"). This fan has an optional Weather-Cap and can be installed through windows or external walls to extract air from smaller scale bathrooms.

Power Usage

The HCM Series uses extremely little energy and is required ONLY as a space is used.
Average Energy Consumption: 0.1-0.2kW/ year
Average Energy Cost: approx. \$12-25/ year
