

EziFit Thru Roof Fan

What does it do?

The EziFit Thru Roof Range which exhausts steam, odours & fumes from bathroom & laundry spaces through a roof mounted duct channel. Available in 150-200mm throat size.

Why is it important?

Exhaust of damp air filled with warmth & moisture from a bathroom or laundry space, mitigates the growth of mould and or introduction of damp odours to the rest of a home.

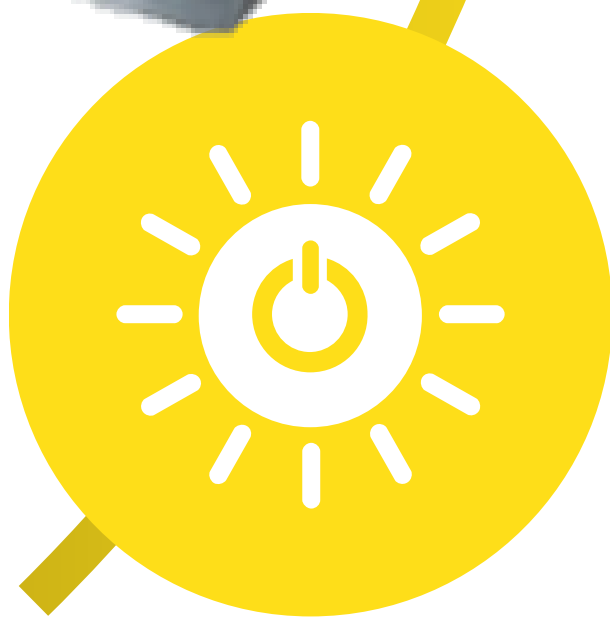

c/w Tile or Metal Roof Flashing

How does it work?

The EziFit range comes complete with Tile or Metal Roof Flashing to mount through your roof. This means the fan motor is positioned externally, minimising noise pollution in your space. Air is extracted through a ceiling mounted grille, ducted direct to the throat of the fan which will exhaust via the roof cowl.

BAL Compliant Options

Power Usage

The EziFit Thru Roof Range uses extremely little energy and is required ONLY as a space is used.
Average Energy Consumption: 100-130kW/ year
Average Energy Cost: <\$40-50/ year
