

Silent Series

Thru Wall Mounted Fan

What does it do?

The Silent Series are an External Wall or Ceiling Mounted unit which exhaust steam, odours & fumes from bathroom & laundry spaces. Where direct installation is not possible, they can be ducted through wall and/or ceiling space.

Why is it important?

Exhaust of damp air filled with warmth & moisture from a bathroom or laundry space, mitigates the growth of mould and or introduction of damp odours to the rest of a home.

How does it work?

The Silent Series is a set-and-forget style fan which can be programmed to your light switch and used in conjunction with an electrical Run-On-Timer (see “accessories”). This petite fan is ULTRA QUIET and can be ducted through ceiling/wall space or direct outlet through an external wall.

Power Usage

The Silent Series uses extremely little energy and is required ONLY as a space is used.
Average Energy Consumption: <0.2kW/ year
Average Energy Cost: approx. <\$15/ year
